Quality of website changes with font

The screenshot shows the Google Fonts API interface. It displays two sections: 'Open Sans' and 'Dancing Script'. Each section has a 'Variable' tab selected. In the 'Open Sans' section, there are three tabs: 'Full axis' (selected), 'One value', and '0 - 1'. Below these are dropdown menus for 'Italic' (0) and 'Width' (100). A 'Copy code' button is available. The 'Dancing Script' section also has tabs for 'Full axis' (selected), 'One value', and '0 - 1'. Below are dropdown menus for 'Weight' (400 - 700) and 'Width' (400 - 700). A 'Copy code' button is available. The interface includes a 'Change styles' button and a 'Reset all' button.

HTML **CSS**

```

1 .form {
2   display: flex;
3   flex-direction: column;
4   gap: 10px;
5   background-color: #ffffff;
6   padding: 30px;
7   width: 450px;
8   border-radius: 20px;
9   font-family: -apple-system, BlinkMacSystemFont, 'Segoe UI', Roboto, Oxygen,
Ubuntu, Cantarell, 'Open Sans', 'Helvetica Neue', sans-serif;
10 }
11
12 ::placeholder {
13   font-family: -apple-system, BlinkMacSystemFont, 'Segoe UI', Roboto, Oxygen,
Ubuntu, Cantarell, 'Open Sans', 'Helvetica Neue', sans-serif;
14 }
15
16 .form button {
17   align-self: flex-end;
18 }
```

CSS & UI Libraries

Upgrade your skill in css with helper classes

- Tailwind CSS – Utility-first CSS framework.
- Bootstrap – Popular front-end framework.
- CSS Gradient – Generate beautiful CSS gradients.
- Animista – Pre-built CSS animations.
- Uiverse.io – Neumorphism UI generator.
- Neumorphism.io – Neumorphism UI generator.

A screenshot of a developer's portfolio website displayed on a laptop. The website has a clean, modern design with a white background. At the top, it shows the developer's name, Ajay Kumar Rajamundry, and title, Web Developer, along with contact information. Below this is a section titled "About Me" containing a brief bio and links. The "Projects" section displays four projects in a grid, each with a thumbnail, title, description, and tech stack. The laptop screen is set against a background of overlapping colored squares (orange, red, purple) and is positioned on a dark surface with an Apple logo visible.

How you showcase your project matters

Use online sites
Shots.so

Display your project in professional way

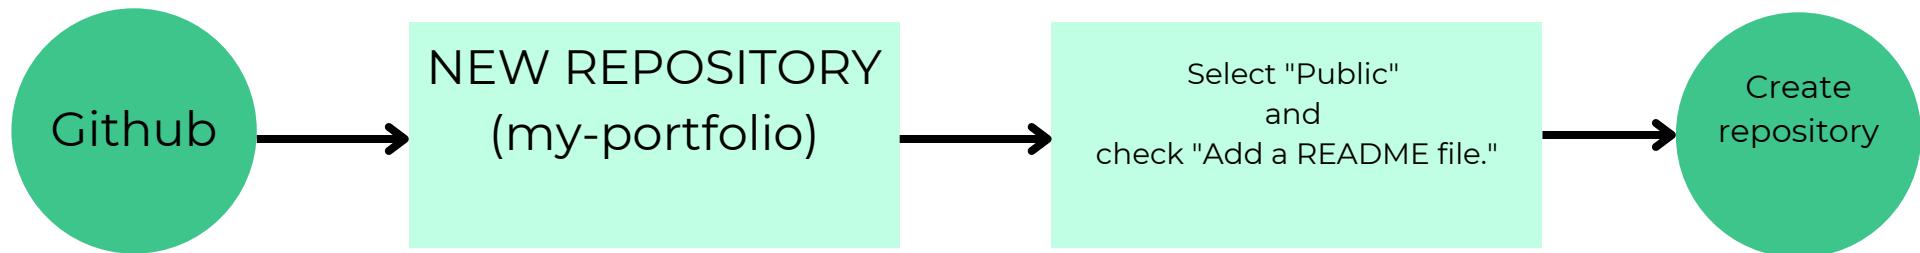

- Spline – Interactive 3D design tool.
- Three.js – JavaScript library for 3D rendering.
- Figma Mockups – Free design and mockup tool.
- Artboard Studio – Create product mockups easily.

Stock Images & Illustrations

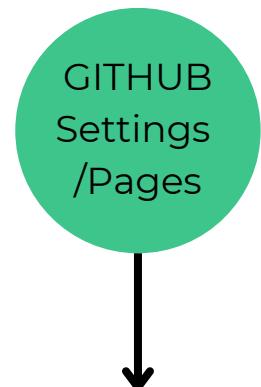

- [Unsplash – High-quality stock images.](#)
- [Pexels – Free stock photos and videos.](#)
- [Freepik – Free and premium illustrations.](#)
- [Blush – Customizable illustrations.](#)

STEP 1

STEP 2

Upload Your Portfolio Files (Index.html)

STEP 3

Under "Branch,"

select "main"

click "Save"

RESULT

<https://ajay2123.github.io>

<https://your-username.github.io/my-portfolio/>

REACT

Step 1: Install GitHub Pages Package

```
npm install gh-pages --save-dev
```

Step 2: Configure package.json

Add the following lines to your `package.json`:

```
"homepage": "https://your-username.github.io/repo-name/",  
"scripts": {  
  "predeploy": "npm run build",  
  "deploy": "gh-pages -d build"  
}
```

Step 3: Build and Deploy

Run:

```
npm run deploy
```

This will create a `gh-pages` branch and deploy your React app.

Step 4: Enable GitHub Pages

- Go to your repository on GitHub.
- Navigate to **Settings > Pages**.
- Select the `gh-pages` branch and click **Save**.

Your React app is now live at:

```
https://your-username.github.io/repo-name/
```
